Nexus(E-commerce Website) will be a dedicated platform for gamers to discover, purchase your favorite games. The website will cater to a diverse audience, from casual gamers to hardcore enthusiasts, offering a wide range of products and services.

Frontend : React js, Bootstrap,

Backend : Node, Express js

Developed an **Online Voting System** using Python and **Django** to enable secure, user-friendly digital voting. The system allows authenticated users to cast their votes and ensures fairness by preventing duplicate voting through voter authentication and status tracking. Key features include candidate listing, real-time vote counting, and results visualization.

Frontend : HTML, CSS, JavaScript,

Backend : python Django
